Subject: Reclamation - EPA meeting

Rose -

I cancelled the October 14 meeting.

Jared could meet on October 15 at 2:00. If that works, Alexis and I could meet with Don and others earlier and he could finish the day with Jared.

Jared is out of town on October 22. If Don prefers Oct 22, Alexis and I are available (and we wouldn't make you fill out a form ;)

Please share this very draft and very long list of potential agenda topics with Don, and whoever else you think appropriate. I included some of the ideas he mentioned already but he may have more to add. And then unless he wants to stay for a week, we'll need to prioritize and trim it down.

1. Related to Drainage, we could discuss the relationship between:
 - EPA's upcoming water quality criteria for selenium
 - Grasslands Bypass Project extension (we are particularly interested in learning more about the prospects for selenium treatment technology)
 - drainage service for the San Luis Unit
2. EPA's work to promote a regional water quality monitoring & assessment system and how this relates to Reclamation's various monitoring programs, including SJ River Restoration monitoring, real-time monitoring for TMDL compliance, Grasslands Bypass Project monitoring
3. Sacramento Regional Sanitation District and how we might collaborate on
 - supporting the Water Board's permit renewal
 - encouraging water reclamation
4. Climate Change - We recently added BOR as a collaborator on our work with DWR and the Corps to develop a Handbook to integrate climate change into IRWM plans. Are there other ways we can be working together on climate change?
5. BDCP? I'm sure there will be something to discuss.
6. VAMP - what next?
7. Other upcoming Clean Water Act actions (by the State or Regional Board) that would impact Reclamation
8. water/energy efficiency work - there are probably things we could talk about though we've spent a lot of time together lately preparing for the Roundtable, so I think this would be a lower priority

Have a great weekend! - Karen
